

BARRFLY™ AIR BARRIER for midges and mosquitos

Patent Pending

Here's what the
experts say!

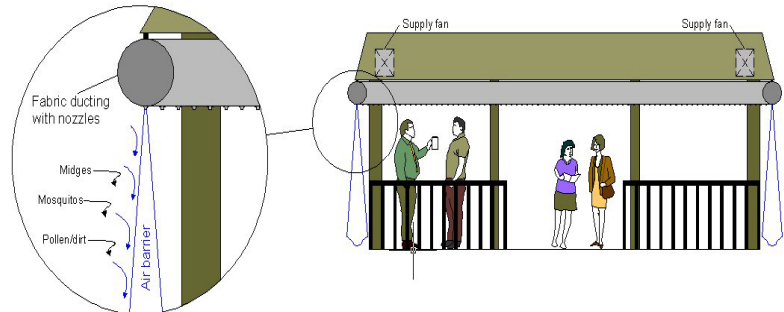

“Midges don't like anything more than a gentle breeze, during the tests, midge traps were put in place inside and outside the air curtained areas, **and virtually none were caught inside!**”

Dr Alison Blackwell
Advanced Pest Solutions
The Sunday Times 14th Aug 2005

“We suffer very badly during the summer months and have tried everything to protect our customers from being bitten. We have run various types of machines, including the CO2 machines which suck midges in and trap them in a net, **but this one has been the most effective!**”

Douglas Murray
Lomond Spas, Arrochar
The Sunday Times 14th Aug 2005

And this is how it works

Barrfly™ Air Barrier protects everyone inside the air barrier footprint from infestation of midges and other biting insects.

Installation at Lomond Spas, Arrochar

Winner of the Biggart Baillie
Innovation Award 2006

Barrfly™ insect air barrier by Innovent (Scotland) Limited was the winner of this years Biggart Baillie Innovation Award for Scotland. The Awards ceremony was held at the Glasgow Science Centre on the 9th of February 2006. We were among 10 shortlisted candidates, from an initial 50 candidates from all over Scotland, vetted by the Glasgow Science Centre and ICASS in November 2005.
